Friday, December 4, 2020

### **15<sup>th</sup> Edition of the Global Radio Guide (Winter 2020-21) Now Available**

Rise and set. Day and night. For many, that is the most observation that is required of the sun.

For radio hobbyists, however, our celestial neighbor holds a larger influence on our daily lives, requiring much closer examination. The role it plays in our hobby can be that of a great awakener or a great destroyer.

Now, as we stand on the first steps of Solar Cycle 25, which is already positioning itself to be one of the most talked about solar cycles among radio hobbyists in decades, there is a renewed energy in the hobby for all things HF. Many are venturing out, some for the first time, into the vastness of radio bands that once again crackle with life.

For this journey, you will need an experienced and knowledgeable guide. Gayle Van Horn, as she has for the past 30 years, has stepped up to answer that call.

Teak Publishing is proud to announce the 15<sup>th</sup> Edition of the Amazon bestselling e-book, the *Global Radio Guide (Winter 2020-21)*, by Gayle Van Horn, W4GVH.

“This publication will have wide appeal to amateur radio operators, shortwave radio hobbyists, news agencies, news buffs, educators, foreign language students, expatriates, or anyone interested in listening to a global view of world news and major events as they happen,” says Larry Van Horn, co-founder of Teak Publishing and editor of the *Global Radio Guide (GRG)*

With the help of the GRG, you can tune in shortwave broadcast stations from hotspots such as China, Cuba, India, Iran, North/South Korea, Taiwan, and many other countries. If you have a shortwave radio receiver, SDR or Internet connection, pair it with this unique radio resource to know when and where to listen to the world.

This newest edition of the GRG carries on the tradition of those before it with an in-depth, 24-hour station/frequency guide with schedules for selected AM band, longwave, and shortwave radio stations. This unique resource is the only radio publication that lists by-hour schedules that include all language services, frequencies, and world target areas for over 500 stations worldwide.

The GRG includes listings of DX radio programs and Internet website addresses for many of the stations in the book. There are also entries for time and frequency stations as well as some of the more “intriguing” transmissions one can find on the shortwave radio bands.

Gayle has also updated her now famous *SDR Buyer’s Guide*, a must-have compendium that helps you navigate through revolutionary world of software-defined radios (SDRs), the digital frontier of the radio hobby.

New in this 15<sup>th</sup> edition of the GRG, Gayle dives into how and where to hear exotic shortwave stations transmitting in the world’s tropical radio bands. Located in the lower portion of the HF spectrum, these stations serve as a window into the culture and daily lives of countries not served by large international broadcast stations. Even in an increasingly connected and digital world, for many of the citizens in these countries, these radio stations serve as the only source of news and information they have at their disposal.

*Spectrum Monitor* magazine editor, Ken Reitz checks in with a primer on where you can hear global radio and television media broadcasters via satellite.

Fred Waterer, also of *Spectrum Monitor*, checks in with a feature on listening to music from around the globe on shortwave. There is a nostalgic look back at radio in 1922 by our friends at AWR Wavescan. *Teak Publishing’s* Larry Van Horn will give the reader an exclusive tour of frequencies and radio services below 530 kHz in Radio’s Basement Bands.

Whether you monitor shortwave radio broadcasts, amateur radio operators, or aeronautical, maritime, government, or military communications in the HF radio spectrum, this book has the frequencies to help you to hear it all. Teak Publishing’s *Global Radio Guide* “brings the world to you.”

You can find this edition of the *Global Radio Guide*, along with all of our titles currently available for purchase, on the Teak Publishing Web site at [www.teakpublishing.com](http://www.teakpublishing.com)

The 15<sup>th</sup> edition of the *Global Radio Guide* e-Book (electronic book only, no print edition available) is available worldwide from Amazon and their various international websites at <https://www.amazon.com//dp/B08PHX81Z1/>

The price for this latest edition is US\$8.99. Since this book is being released internationally, Amazon customers in the United Kingdom, Germany, France Spain, Italy, Japan, India, Canada, Brazil, Mexico and Australia can order this e-Book from Amazon websites directly servicing these countries. Customers in all other countries can use the regular Amazon.com website to purchase this e-Book.

You can read any Kindle e-Book with Amazon’s ‘free’ reading apps on literally any electronic media platform. You do not have to own a Kindle reader from Amazon to read this e-book. There are Kindle apps available for iOS, Android, Mac and PC platforms. You can find

additional details on these apps by checking out this link to the Amazon website at <https://www.amazon.com/kindle-dbs/fd/kcp>.

Review of the new Global Radio Guide 15<sup>th</sup> edition:

### Top review from the United States

BA Fan

★★★★★ **Excellent publication**

Reviewed in the United States on December 4, 2020

**Verified Purchase**

Always timely and relevant. This season's GRG is a go to resource for most everything a radio monitor will need. There's a good summary of the available SDR hardware and software that are currently available. Go ahead and download this to your Kindle reader, you won't be disappointed.
